

## ***HONORS CHEMISTRY SUMMER ASSIGNMENT***

Welcome to Honors Chemistry!

I don't want to give you too much work for the summer. It is supposed to be a break. But just to help things run more smoothly in the fall, I want you to brush up on the names and symbols of some of the elements. Go to [www.webelements.com](http://www.webelements.com) or another site that has the periodic table. Learn the names and symbols of the elements in the first two and last six columns. You may recall from Physical Science that these are the main group elements. You will be quizzed on this when you return.

The title of our text is Chemistry: The Central Science. Keep your eyes open over the summer for news articles on something involving chemistry: pollution, drugs, high tech materials, art restoration, etc. In September, bring in two articles that show the role of chemistry in the "real world".

Enjoy your summer,  
Dr. Kennelly
